“FACTS ABOUT VIRGIN HAIR”

True

False

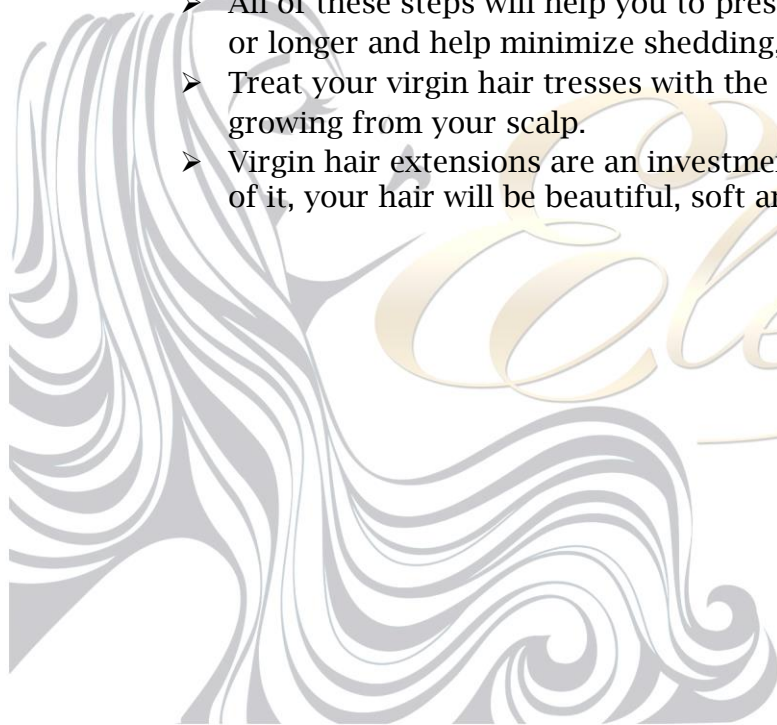

- Virgin hair is human hair that has not been permed, relaxed, dyed, colored, bleached or chemically processed in any way.
- It usually comes from a single donor but, can come from multiple donors
- All the cuticles run in the same direction. Cuticles run in the same direction to prevent tangling.
- Most virgin hair has been “steamed” processed to give it that tight “S” shape, wavy or curly pattern.
- Regardless of what any virgin hair extension retailer tells you, virgin hair does and will shed! The hair growing from your scalp sheds 75-150 hairs a day. Your human hair bundles may not shed as much but, they will shed. To minimize the shedding, it is recommended that you do not cut your wefts when installing them. Have a professional hair stylist wrap the tracks around the base without cutting. We **highly** recommended that you seal your wefts prior to installation whether you cut them or not to minimize the shedding. We can seal your bundles for you (\$5 for one bundle, \$8 for two bundles or \$12 for three bundles).
- Good quality virgin hair comes in Grades 5A-6A and is double drawn.
- A true full bundle comes in 3.5 oz-4.0 oz.
- Virgin hair can be colored, bleached or highlighted but, it is **highly** recommended for you to consult a professional, licensed hair stylist.
- Virgin hair comes in natural colors ranging from dark brown to light brown (#1B - #4).
- Virgin hair should last 6 months to a year or more with proper care and maintenance.
- Virgin hair needs very little styling product. Sometimes Aragon oil is needed for dryness and a thermal protectant is **highly** recommended when straightening or curling.
- For a full sew-in with hair left out and using 12”-16”, use (2- 2 ½ bundles), if using 18”-22”, use (2 ½-3 bundles) and if using 24” or longer, use (3 ½ -5 bundles) depending on the style you choose and your desired fullness. For a full sew-in with no hair left out, add a (½ -1 bundle). Again, please consult a licensed professional.

“FACTS ABOUT VIRGIN HAIR”

- Use a deep penetrating, moisturizing shampoo and conditioner, preferably sulfate free.
- You **must** prep your hair at night before you go to bed. You can do this by, pinning it up, wrapping it or putting it in a ponytail and covering your hair with a satin bonnet, scarf or doo-rag. This will keep the hair from tangling and becoming dry.
- Comb or brush your tresses from the ends going up to prevent tangles with a wide-tooth comb or brush.
- **Never** go to bed with wet hair! Make sure your hair has been thoroughly dried before going to sleep.
- All of these steps will help you to preserve your hair for 6 months to a year or longer and help minimize shedding, tangling and dryness.
- Treat your virgin hair tresses with the same care you would with the hair growing from your scalp.
- Virgin hair extensions are an investment! If you buy good hair and take care of it, your hair will be beautiful, soft and last a long time.
